-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claims 1-9 are indefinite: in reciting improper Markush language, viz. "the group comprising" (claims 1, 5, 8); since it is not known what "A-granule wheat starch" is (claims 1, 5, 8); and since it is unclear as to whether the two starches claimed in the last two lines of claims 1, 5 and 8 are part of the Markush group. Claims 1-9 are also indefinite as to scope in reciting the genus "granular starches" and a species thereof "in particular...starches" in a single claim. Claims 1-7 are also indefinite as to scope in reciting "that can possibly be". Claim 3 is indefinite as to scope in reciting two different ranges for the swelling agent in a single claim. Claims 8 and 9 are indefinite in failing to recite a positive method step of "incorporating". Corrections are required without new matter.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Stroz et al (4,241,090, cols. 2-3) in view of Stubits et al or the Derwent publication. Stroz et al discloses a chewing gum including up to 35% gum base, 3% modified food starch, 40-

60% sorbitol solids, maltitol and plasticizer. It would have been obvious to use hydroxypropyl starch or carboxymethyl starch as the modified starch in Stroz et al since either of these starches is used in preparing chewing gum products, as evidenced by the secondary references.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Gonze et al discloses chewing gum coated with hydroxypropylated starch.
